DATA VISUALISATION OF BIRD STRIKES BETWEEN 2000 – 2011

1. INTRODUCTION

1.1 ABOUT THE DATA

THE DATA CONTAINS 26 COLUMNS AND 25559 ROWS, CONTAINING INFORMATION ABOUT THE COLLISION OF BIRDS WITH DIFFERENT TYPES OF AIRCRAFT BELONGING TO VARIOUS AIRLINES, THE AIRPORT NAME, THE AIRCRAFT'S ALTITUDE, THE BIRD'S SIZE, THE NUMBER OF COLLISIONS, ETC.. THE DATA ALSO CONTAINS MISSING VALUES WHICH ARE LABELLED AS 'NULL' .

1.2 OBJECTIVES

THE MAIN OBJECTIVES OF THIS PROJECT ARE TO:

- 1.VISUALISE THE DATA TO SEE MEANINGFUL CORRELATIONS USING POWER BI
2. COMPARE THE NUMBER OF COLLISIONS REPORTED TO THE ACTUAL NUMBER OF COLLISIONS CAUSED.
3. THE AIRLINE WHICH ACCOUNTS TO THE MAXIMUM NUMBER OF COLLISIONS.

1.3 DATA CLEANING

WE FIRST CHECK FOR THE DATA TYPE OF EACH COLUMN AND CORRECT IT. FOR INSTANCE, THE FIGHTDATE COLUMN HAS DATE AND TIME ALONG WITH IT BUT TIME IS IRRELEVANT IN THE ANALYSIS HENCE WE CHANGE THE COLUMN DATATYPE FROM DATE/TIME TO DATE.

SECONDLY, WE THEN NOTICE 129 ROWS HAVING MISSING VALUES (NULL) IN SEVERAL COLUMNS. WE COULD FILL THESE ROWS USING THE FILL UP OR FILL DOWN OR DELETE THEM. FILLING THESE NULL VALUES HERE WOULD BE INACCURATE AS MISFILED ROWS FOR IMPORTANT COLUMNS SUCH AS ALTITUDE OR AIRPORT NAME CAN LEAD TO INACCURATE RESULTS. HENCE, WE DELETE THE ROWS CONTAINING NULL VALUES.

2. METHODOLOGY

* A STACKED COLUMN CHART (CHART 1) IS PLOTTED AGAINST THE AIRLINE AND THE NUMBER OF WILDLIFE STRUCK. THE TOP 5 AIRLINES WITH THE HIGHEST ACTUAL NUMBER OF WILDLIFE STRUCK ARE BUSINESS (9300), SOUTHWEST AIRLINES (9200), AMERICAN AIRLINES (6100), DELTA AIRLINES (3900) AND US AIRWAYS (3400).

HOWEVER, THE NUMBER OF WILDLIFE STRUCK THAT WAS REPORTED BY AIRLINES WAS IN A DIFFERENT ORDER, WITH THE TOP 5 BEING SOUTHWEST AIRLINES (4600), BUSINESS(3100), AMERICAN AIRLINES (2100), DELTA AIRLINES (1300) AND AMERICAN EAGLE AIRWAYS (932).

* A STACKED BAR CHART (CHART 2) IS PLOTTED AGAINST AIRPORTS AND THE NUMBER OF WILDLIFE STRUCK ACTUAL. THE TOP 5 AIRPORTS ACCOUNTING FOR THE HIGHEST NUMBER OF WILDLIFE STRUCK ACTUAL ARE DALLAS/ FORT WORTH INTL ARPT (2900), SACRAMENTO INTL (1900), LAGUARDIA NY (1600), PHILADELPHIA INTL (1400) AND SALT LAKE CITY INTL (1400).

* THE TOTAL NUMBER OF WILDLIFE STRUCK AT <1000 FT IS 59802 AND AT >1000 FT IS 8847. (CHART 6)

* A LINE CHART IS PLOTTED (CHART 9) AGAINST THE NUMBER OF WILDLIFE STRUCK ACTUAL AND YEAR. THE LINE IS NOT AN INCREASING LINE ALTHOUGH THERE ARE INCREASING TRENDS. THE HIGHEST NUMBER WAS IN 2010 (7657) AND THE LOWEST WAS IN 2004 (4349).

* A MATRIX IS CONSTRUCTED (CHART 8) TO BREAKDOWN THE NUMBER OF WILDLIFE STRUCK ACTUAL EACH YEAR AND EACH MONTH OF THAT YEAR. AUGUST ACCOUNTS FOR THE HIGHEST NUMBER (11013) AND FEBRUARY ACCOUNTS FOR THE LOWEST (2602).

* THE TOTAL COST DUE TO THE BIRD STRIKES WAS \$142 M (CHART 3). TWO PIE CHARTS (CHART 4 & CHART 5) ARE CONSTRUCTED TO FIND THE TOP 5 AIRLINES AND AIRPORTS THAT INCURRED THE HIGHEST COST.

THE TOP 5 AIRLINES WITH THE HIGHEST COSTS WERE BUSINESS (\$54M), UNITED AIRLINES (\$12M), FEDEX EXPRESS (\$8M), DELTA AIRLINES (\$8M), AND UPS AIRLINES (\$7M).

THE TOP 5 AIRPORTS WITH THE HIGHEST COSTS WERE TROY MUNICIPAL ARPT (\$12M) SAN FRANCISCO INTL ARPT (\$8M), NEWARK LIBERTY INTL ARPT (\$7M), SALT LAKE CITY INTL (\$7M) AND MARTIN STATE ARPT (\$6M).

* AN AREA CHART (CHART 7) WAS PLOTTED AGAINST THE PHASE OF FLIGHT AND THE NUMBER OF WILDLIFE STRUCK THE ACTUAL. HIGHEST NUMBER OF WILDLIFE WERE STRUCK DURING APPROACH (25000), FOLLOWED BY TAKE-OFF (14000), LANDING (14000), CLIMBING (14000) AND DESCENT (1000).
